APPENDIX
PRESIDENTIAL REGULATION OF THE
REPUBLIC OF INDONESIA
NUMBER 7 OF 2021
CONCERNING
THE 2020-2024 NATIONAL ACTION PLAN
FOR PREVENTING AND COUNTERING
VIOLENT EXTREMISM THAT LEADS TO
TERRORISM

CHAPTER I
INTRODUCTION

A. BACKGROUND

The commitment of the Unitary State of the Republic of Indonesia in countering terrorism is an important part of the mandate of Pancasila, as a way of life as well as the ultimate source of law. This is also part of the effort to achieve the goals of the State, mainly to protect the whole people of Indonesia and the entire homeland of Indonesia, as well as contribute to the implementation of a world order, as confirmed in the Preamble to the 1945 Constitution of the Republic of Indonesia. In particular, Article 28G paragraph (1) of the 1945 Constitution of the Republic of Indonesia has affirmed that everyone "has the right to feel secure and to be protected against threats from fear." Furthermore, this commitment has been institutionalized through Law Number 15 of 2003 concerning the Stipulation of Government Regulations in Lieu of Law Number 1 of 2002 concerning the Eradication of Criminal Acts of Terrorism to Become a Law, as amended by Law Number 5 of 2018 concerning Amendments to Law Number 15 of 2003 concerning Stipulation of Government Regulations in Lieu of Law Number 1 of 2002 concerning the Eradication of Criminal Acts of Terrorism to Become a Law..

The development of terrorism as a global threat is directly proportional to the increase in situations that enable the emergence of violent extremism. This condition is exacerbated by the ease with which

**THE PRESIDENT OF
THE REPUBLIC OF INDONESIA**

- 2 -

terrorist groups spread their ideology, through various means of communication, both face-to-face meetings (offline) and information and communication technology-based instruments, especially the internet (online). This method has proven to be effective in disseminating propaganda and extreme ideology aimed at influencing the public to sympathize and support acts of terrorism. These terrorist groups have even been actively and continuously recruiting, with the target of Indonesian citizens, to participate in violent extremism activities that lead to terrorism, and to be involved in acts of terror, including the recruitment and engagement of women and children.

This action plan aims to deal with the drivers of Violent Extremism that Leads to Terrorism, namely (1) conducive conditions and structural context; and (2) the radicalization process. Conducive conditions and structural context as driving factors include economic inequality, marginalization and discrimination, poor governance, human rights violations and weak law enforcement, prolonged conflicts, and radicalization within prisons. Meanwhile, the radicalization process is broken into several factors, namely individual background and motivation, victimization, and collective grievances, as well as distortion of certain understandings (rooted in beliefs, political ideology, ethnic and cultural differences, social networks, and leadership).

Violent extremism that leads to terrorism can be interpreted as beliefs and/or actions that use violent means or threats of extreme violence with the aim of supporting or committing acts of terrorism. Furthermore, preventing and countering Violent Extremism that Leads to Terrorism are efforts carried out in a systematic, planned and integrated manner to prevent and countering Violent Extremism that Leads to Terrorism.

As a strategy to respond to problems related to Violent Extremism that Leads to Terrorism, a National Action Plan for Preventing and Countering Violent Extremism that Leads to Terrorism (NAP on PCVE) is thus imperative. The NAP on PCVE is expected to be a guide in overcoming

**THE PRESIDENT OF
THE REPUBLIC OF INDONESIA**

- 3 -

the drivers of violent extremism, particularly those that lead to criminal acts of terrorism in Indonesia. The NAP on PCVE complements the various laws and regulations related to the eradication of the criminal act of terrorism. It functions as a coordinating guide for ministries and institutions, in synergy to jointly increase resilience, tackle violent extremism, and prevent Terrorism.

The NAP on PCVE is one of the efforts to counter terrorism that puts forward a soft approach in tackling Violent Extremism that Leads to Terrorism. The action plan contained in the NAP on PCVE is a series of coordinated programs that will be implemented by various relevant ministries/agencies to mitigate violent extremism. In this regard, the NAP on PCVE complements various national laws and regulations related to the criminal act of terrorism.

The need for a comprehensive approach in countering Terrorism reaffirms the importance of formulating a national action plan that is able to harmonize the roles and functions of each ministry/agency in tackling Violent-Based Extremism that Leads to Terrorism. In response to this need, the NAP on PCVE contains measures to tackle Violent Extremism that Leads to Terrorism. The NAP on PCVE not only targets the driving factors, but also aims at building community resilience in general, in countering Violent Extremism that Leads to Terrorism.

The process of formulating this action plan has involved various relevant stakeholders, both from ministries/agencies and civil society. Thus, it is expected that the NAP on PCVE will become the main reference for the implementation of countermeasures against Violent Extremism that Leads to Terrorism by each relevant ministry/agency. The formulation and implementation of the NAP on PCVE emphasizes the involvement of the whole of government and the whole of society. These approaches are integral to the soft approach and the hard approach in countering terrorism.

The NAP on PCVE includes 3 (three) pillars of prevention and

**THE PRESIDENT OF
THE REPUBLIC OF INDONESIA**

- 4 -

overcoming Violent Extremism that Leads to Terrorism, as its main strategy and program, covering (1) the pillars of prevention, including preparedness, counter-radicalization and deradicalization; (2) the pillars of law enforcement, witness and victims protection, and strengthening of the national legislative framework; and (3) the pillars of international partnership and cooperation. Overall, both in the process and in its implementation, the NAP on PCVE takes into account human rights principles; rule of law and justice; gender mainstreaming and fulfillment of children's rights; security and safety; good governance; participation of multi-stakeholders; as well as diversity and local wisdom.

Based on these considerations, the NAP on PCVE will be implemented through the following steps:

1. coordination between ministries/agencies (M/A) in order to prevent and counter Violent Extremism that Leads to Terrorism;
2. participation and synergy in the implementation of programs to prevent and counter Violent Extremism that Leads to Terrorism, which are carried out by Ministries/Agencies, civil society, and other partners;
3. human resources capacity building to prevent and counter Violent Extremism that Leads to Terrorism;
4. oversight, early detection, and early prevention of acts and messages of Violent Extremism that Lead to Terrorism; and
5. attention to victims of criminal acts of terrorism and protection of infrastructure and other critical infrastructures.

The NAP on PCVE is a living document whose implementation can be adjusted to the focus, potential and problems of each ministry/agency.

B. OBJECTIVE

The general objective of the NAP on PCVE is to increase the

**THE PRESIDENT OF
THE REPUBLIC OF INDONESIA**

- 5 -

protection of the rights to the sense of security of citizens from Violent Extremism that Leads to Terrorism, as part of the implementation of state obligations to the fulfillment of human rights in order to maintain national security stability based on Pancasila and the Constitution of the Republic of Indonesia. 1945.

The specific objectives are:

1. To improve coordination between ministries/agencies (M/A) in order to prevent and counter Violent Extremism that Leads to Terrorism related to the programs set out in the NAP on PCVE's Pillars;
2. To increase participation and synergy in the implementation of the programs of preventing and countering Violent Extremism that Leads to Terrorism, which are carried out by ministries/agencies, local governments, civil society, and other partners;
3. To develop instruments and system regarding data collection and monitoring to support efforts to prevent and counter Violent Extremism that Leads to Terrorism;
4. To increase the capacity of the apparatus and infrastructure in a systematic and sustainable manner, to support programs for preventing and countering Violent Extremism that Leads to Terrorism; and
5. To enhance international cooperation, whether through bilateral, regional and multilateral cooperation, in preventing and countering Violent Extremism that Leads to Terrorism.

CHAPTER II
THE 2020-2024 NATIONAL ACTION PLAN STRATEGY
FOR PREVENTING AND COUNTERING VIOLENT
EXTREMISM THAT LEADS TO TERRORISM

To achieve the 2020-2024 NAP on PCVE targets, it is necessary to formulate a strategy as outlined in 3 (three) pillars as follows:

- a. Pillar 1: Prevention (preparedness, counter-radicalization and deradicalization)
- b. Pillar 2: Law Enforcement, Witness and Victim Protection, and Strengthening the National Legislative Framework.
- c. Pillar 3: International Partnerships and Cooperation.
